

## Helpful Suggestions to assist in your Photo Shoot Experience:

1. Bring any accessories with you that you would like to be incorporated into your pictures. Items commonly brought include: sports equipment, musical instrument or a treasured memento.
2. If you have seen poses on websites, old photographs, magazines, etc., that you particularly like, bring pictures with you. I will try to recreate the pose. If it requires specific props, please bring them with you.
3. Suggest that you do not "change" your hair style too drastically--it's best to be natural with the hair style that is most comfortable for you and recognizable by family and friends.
4. Bring as many clothing changes as you like, wearing your first pose attire as you arrive for the photo shot. There is no additional charge for outfit changes. Don't forget to bring ALL accessories that you plan to use for each pose, including jewelry, sunglasses, hat, etc. Also, have any makeup/hair styling supplies for freshening up after any clothing changes. Have your outfit changes and accessories organized before your appointment to eliminate stress.
5. It takes up to 7-10 days for sunburn or a visit to the tanning booth to heal. If you choose to do this, do it at least two (2) weeks prior to your appointment to avoid shine, redness and blotches in your pictures.
6. If you wear glasses on a daily basis, have a pair ready without the lenses to eliminate reflection from the lights.
